Hi - Can't seem to figure out how to save a topic I like so I can refer back to it without a search. Tried the search function for an answer - must be asking the wrong question. Any help? Thanks

Go to the thread and bookmark it. That's all you have to do. It will then show up on your browser's bookmarks.

Thank You - I was over thinking how to do it.

another option that I use is to enter the post then left click in the URL bar to highlight the address then hit CTRL/C (the copy function in windows). then you can paste it into a document or an email. Here's a picture: I entered a thread, then clicked in the URL line (the address of the thread), this hilights the address, then I used the copy function (CTRL/C). You can see the address bar

hilighted. I am INSIDE the thread looking at its content.

- walt
