Here's How Plug & Play Works. It Couldn't Be Easier!

Lighted vehicles take 20-30 mA each. Using simple math will help you decide which power supply and accessories you will need.

Please note: you may need to account for a small amount of electrical "line loss" (as is true with all electrical wire).

Plug & Play ... Yes, It's That Easy!

Our Plug & Play system is easy to use! Simply plug the 4.5-volt power source into our model buildings and lighted accessories.

Adding accessories has never been easier with our Plug & Play Accessory Kits! Power multiple accessories with the same power source. Choose from 8- and 9-piece kits!

Plug directly into our lighted vehicles.

Plug directly into our buildings.

Plug lighted vehicles into our buildings.

9-Piece Plug & Play Accessory Pack

(2) 4" LED TAPE LIGHTS
Add lighting to your buildings and accessories! Each strip provides bright lighting with simple Plug & Play connection.

(1) 4-WAY SPLITTER
Hook up multiple buildings and/or light up vehicles at one time with a single power supply!
* Electrical draw should not exceed the capacity of the transformer. LED lights on the buildings will flicker and/or flash when power capacity of the transformer is exceeded. This shouldn't harm the buildings but you won't achieve a desired lighting effect. (LED lights behave differently than incandescent when starved for power.)

(3) "Y" SPLITTERS
Split one power supply two ways! Use in conjunction with our extensions for even more versatility!

(1) 3' EXTENSION | **(1) 4' EXTENSION** | **(1) 5' EXTENSION**

Avoid frustration when your cord isn't quite long enough! Our Plug & Play extensions provide a great solution for wiring hard-to-reach buildings and accessories. And, the best part is you don't have to cut, splice or solder your wires!
