

Scenery For All Gauges

Made by the A.C. Gilbert Co.
a Hobby Surplus Exclusive

You won't find these vintage quality plastic scenic accessories anywhere else. Produced by A.C. Gilbert over 20 years ago in various scales for their American Flyer train sets and their slot car sets. We bought all that was left when the factory closed and are now selling them for a fraction of their value. So, you can inexpensively add the realistic details that will bring your layout, diorama, or model to life. These highly detailed pieces are made of tough heavy gauge plastic and molded in the appropriate color or pre-painted. The approximate scale or size is indicated to aid in your selection.
