

Evolution of Power and Control

Happy New Year!

Our team is excited to kick off another amazing year of Lionel products with all of you. Your passion for model trains is a key part of continuing to share the magic of Lionel with fans of all ages. In the attached order forms for Track and Power, you will see both NEW and notice a few missing items. We are truly excited by what the Engineering team has put together for Lionel coming into 2022.

New for 2022!

As we enter our 122nd year of creating some of the most amazing products we are excited to share that you will be seeing the next evolution in Lionel Control systems. Our history of continuous product innovation and advancement in technology along with customer/dealer feedback has pushed Lionel to develop the new CAB3/BASE3 offering.

In short, the new BASE3 Unit will connect to all of our current control options and into one interface. The CAB3 app will be the digital enhancement for previous offerings.

We know this will come with lots of excitement from consumers and we are prepared to help you and all the Lionel train fans be successful. You will see these items featured in our catalogs, social media and be a key part of our Dealer education sessions that we host for each new catalog. This will be one of several opportunities to learn firsthand about the new offering from Dave Olson (Lionel Director of Engineering). This is the evolution of our technology that consumers and dealers have been asking us for!

Changes / Discontinued items:

In a rapidly changing world, the team has been tackling limitations on components, drastic price increases, part obsolescence, and new government testing protocols requiring us to evaluate the Lionel offering. The NEW Base3/Cab3 item will provide consumers with equal and/or improved functionality of the previous Lionel offerings.

614295	Legacy 990 Command Set
614294	Legacy 993 Expansion Set
637147	Cab-1L/Base-1L Set
685296	LCS IRV2
685383	LCS IRV2 Sensor Add-on
637125	Legacy Memory Module Black

*637155 Legacy™ CaB-1L- Remote Control will still be an active item

We are excited to partner with all of you to help make 2022 another successful year.
