# Operating Barrel Car

**C**ongratulations on your purchase of the Lionel Operating Barrel Car! This car features six barrels that are unloaded at the press of a button using a Remote-Control Track section (available separately, 6-65530 for O gauge or 6-12746 for O-27 gauge). A trackside bin is included to receive the barrels.

## Operating your Barrel Car

The Barrel Car can be operated on any Remote-Control Track section with control rails.

1. Load all six barrels into the center channel of the car.
2. Unlatch the barrel guide at the side of the car, allowing the guide to pivot freely. Refer to Figure 1.

**Note!** Secure the latch when the car is in motion to prevent the barrels from falling off the car.

3. Position one truck on a Remote-Control Track section (available separately) so that its sliding contact shoe is on the right-hand side of the track. Position the track bin next to the car to receive the barrels.

**Caution!** Positioning BOTH trucks on the Remote-Control Track section before operating the car will cause a short. Only one truck should be positioned on this section.

4. Press UNLOAD on the Remote-Control Track section's controller, and a barrel will be unloaded.

**Caution!** Do not hold down the UNLOAD button for too long, or the magnetic oil may over-heat and damage your layout.
