

RUN ANY AC POWERED TRAIN*

DCS is the only truly universal control system for AC model trains. It offers an all-in-one solution for running engines equipped with M.T.H. or Lionel command control alongside conventional AC-powered locomotives — even those from model railroading's earliest days!

DCS can run a classic Lionel locomotive on the same track at the same time as a modern Lionel TMCC or Legacy or M.T.H. Proto-Sound 2.0 or 3.0 command-control locomotive.

DCS can run modern Lionel locomotives equipped with TMCC or Legacy alongside M.T.H. Proto-Sound 2.0 or 3.0 locomotives — on the same track at the same time.

Unlike other command systems, DCS doesn't force you to choose between one company's command system and another. DCS allows you to operate all your trains — regardless of their control system — with the DCS App or the DCS Remote.

DCS even allows for simultaneous control of Lionel engines with the Lionel command remote and DCS engines with the DCS remote or App — on the same track at the same time.

DCS — Simply the Best Way to Run a Railroad

User-controlled variable voltage power is output from the 2 Variable Channels for controlling conventional AC-powered locomotives like original Proto-Sound models or older Lionel locomotives. These tracks can also control Proto-Sound 2.0 or 3.0 locomotives in command mode at the same time.

Constant voltage power is output from the 2 Fixed Channels based on the power provided to the Input Channels. These tracks are for command-equipped trains (Proto-Sound 2.0 or 3.0, Lionel TMCC or Legacy).

6-14295 Lionel #990 Legacy Command Set

LEGACY COMMAND BASE

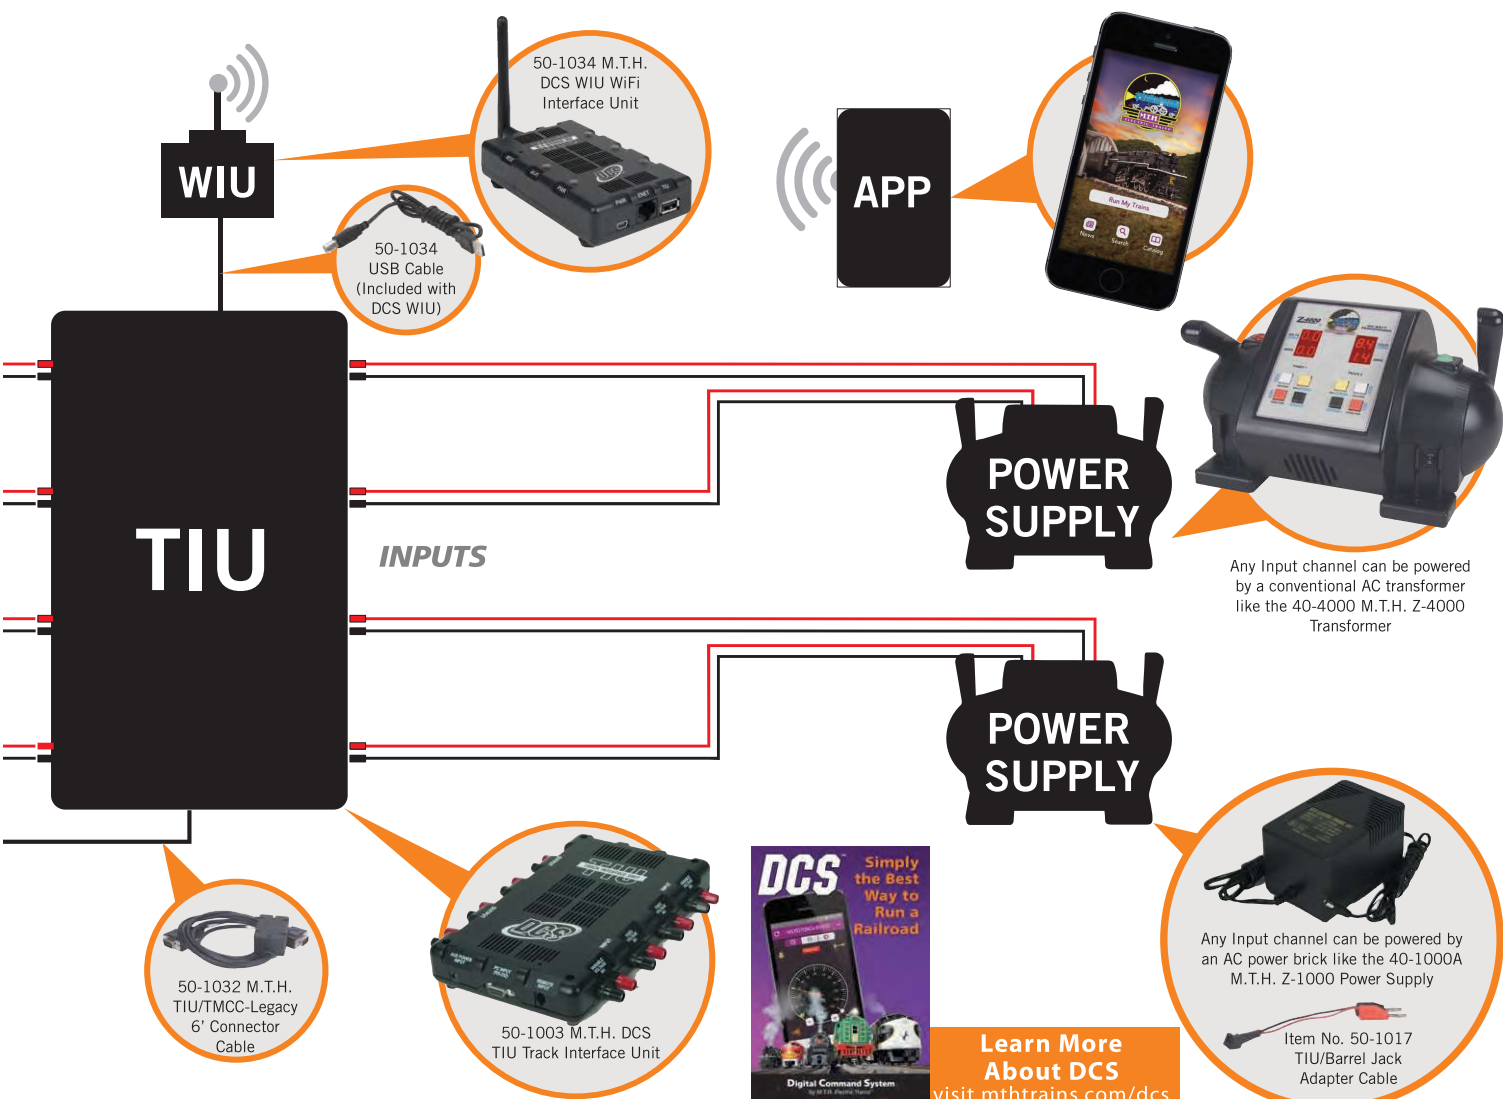

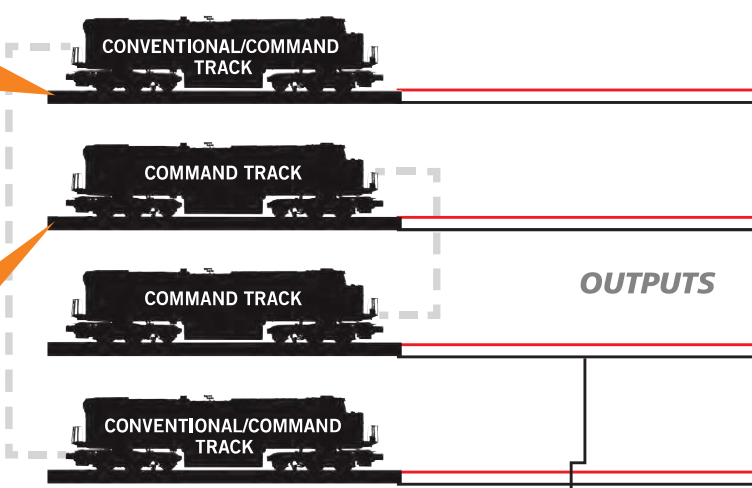

Use the App to Run Lionel Legacy Locomotives and Access Legacy Features

6-81499 Lionel LCS DB-9 Cable w/ Power Supply

6-81326 Lionel LCS Serial Converter 2 (SER2)

*Requires Premium App or DCS Handheld Controller
