

# RUN ANY AC POWERED TRAIN\*

DCS is the only truly universal control system for AC model trains. It offers an all-in-one solution for running engines equipped with M.T.H. or Lionel command control alongside conventional AC-powered locomotives — even those from model railroading's earliest days!

DCS can run a classic Lionel locomotive on the same track at the same time as a modern Lionel TMCC or Legacy or M.T.H. Proto-Sound 2.0 or 3.0 command-control locomotive.

DCS can run modern Lionel locomotives equipped with TMCC or Legacy alongside M.T.H. Proto-Sound 2.0 or 3.0 locomotives — on the same track at the same time.

Unlike other command systems, DCS doesn't force you to choose between one company's command system and another. DCS allows you to operate all your trains — regardless of their control system — with the DCS App.

DCS even allows for simultaneous control of Lionel engines with the Lionel command remote and DCS engines with the DCS App — on the same track at the same time.

**DCS — Simply the Best Way to Run a Railroad**

Lionel 2208010 Command Base3

**Legacy Command Base3**

Use the App to Run Lionel Legacy Locomotives and Access Legacy Features

Lionel PDI Cable (Various Lengths)
