

Connects to any Curve or Straight to Curve E-Z Street® Track

Connects to any Straight or Straight to Curve E-Z Street® Track

Optional: Connect multiple controllers by pushing together. No additional power (red wire) connections are required.

Red wire connects to power supply 10-18VAC

Connect Green wire to controller.

Note:

If the controller switch does not match the operation position of the turnout, remove the connector and rotate 180 degrees.

Throw for manual operation, if desired
