

LIONEL®

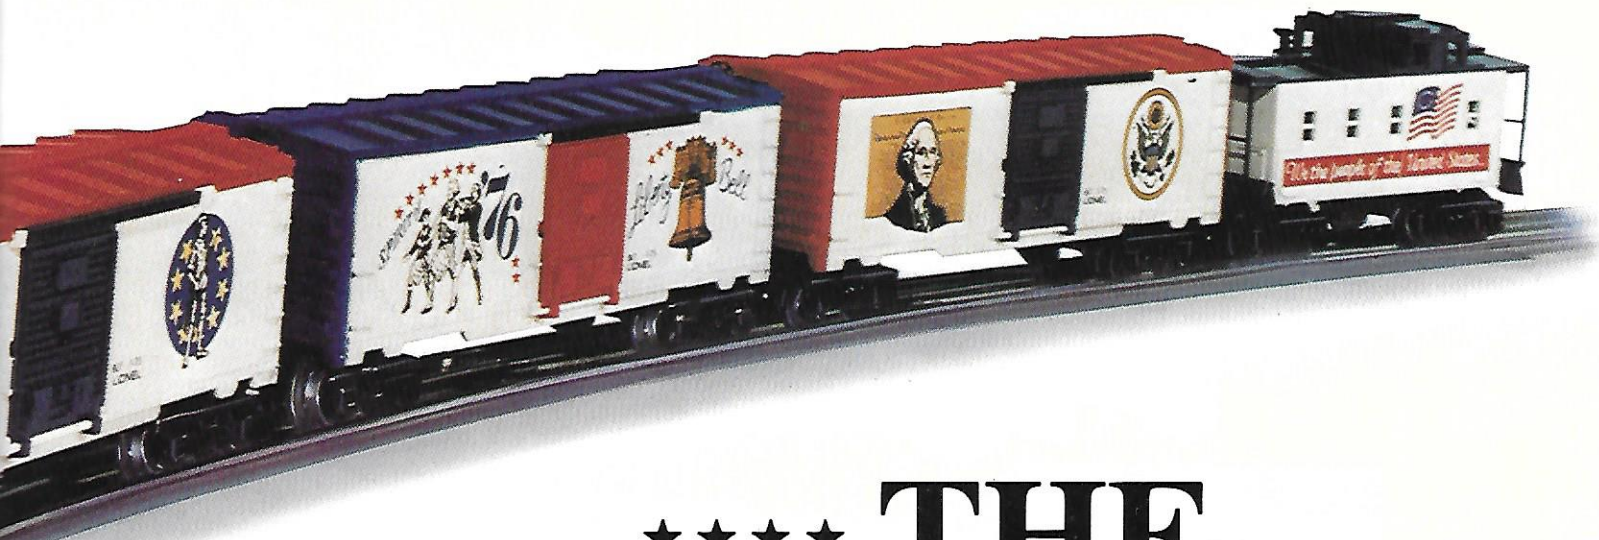

PENNSYLVANIA "LITTLE JOE" ELECTRIC

The Lionel classic "Little Joe" reborn in classic Pennsylvania markings and with many features unique to this engine alone, like pantographs — which can be wired to take overhead power, working headlights and illuminated cabs at both ends. This Electric also features a metal chassis; die cast metal trucks; remote controlled forward, neutral, reverse and operating couplers on both ends.

- A Lionel classic
- Authentic markings
- Pantographs
- Illuminated headlights, and cabs on both ends
- Operating couplers
- Metal frame
- Die cast trucks
- Weighs over 3 pounds

★★★★ **THE**
LIBERTY ★★ ★
SPECIAL

A brilliant red, white and blue color scheme highlights the Liberty Special's very special markings depicting some of the most important scenes of the American Revolution.

The first car depicts Paul Revere's famous call to arms and the Minute Man's spirited reply. The second car shows the famous "Spirit of '76" — the spirit of the American Revolution. Alongside, the Liberty Bell is depicted which rang out freedom to an oppressed colony. Next, George Washington is pictured with the Declaration of Independence which he so strongly fought for during the Revolution and as our first President guided an emerging nation as symbolized in the Great Seal of the United States. Last, on the caboose, are written the opening words of our Constitution "We the People of the United States" against the backdrop of the original 13 star flag.

- Colorful markings
- Multicolor paint on all cars
- Operating couplers
- Working headlight

**"PREAMBLE EXPRESS"
 F-3 DIESEL**

Lionel's reproduction of the Preamble Express captures all the spirit of the Preamble Express in the ever popular F-3 Diesel. The real Preamble is, as its name implies, the prelude to the American Freedom Train which will visit 75 cities in the United States during 1975 and 76 carrying many mementos of our past and graphic displays of our history. The Preamble Express visited those same 75 cities inspecting the trackage, determining display sites and meeting with city officials to finalize plans for the coming of the American Freedom Train.

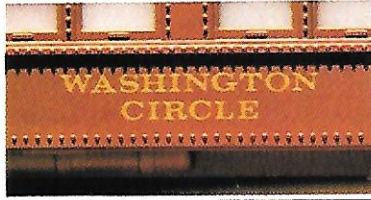

- Authentic markings
- Die cast chassis
- Remote forward, neutral, reverse
- Illuminated headlight
- Die cast trucks
- Operating couplers
