American Power & Light

9-1/2"W x 14-1/2"L x 14-3/4"H 279-3388

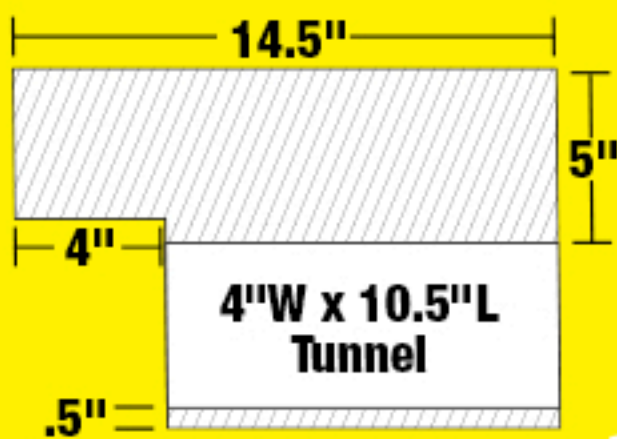

What a sight to behold! Standing nearly 15" tall, the American Power & Light Building is a stunning addition to any O gauge train set! Specifically designed to overlap O gauge tracks with ease, this prelit and preassembled model offers a modest footprint so it doesn't overwhelm your entire train display. Plus, the built-in tunnel adds plenty of play value. It even allows your train through to get to its next stop or just unload coal inside the building.

Not only is this building big in size, but it also sheds a lot of light on your train layout. Outfitted with over 20 brightly glowing lights, each side of the building is beautifully illuminated from top to bottom. You will also notice the animated "American Power & Light" sign, which features numerous lighting patterns. A transformer with two red LED lights, realistic-looking roof vents and a handful of safety signs also give the building an extra flourish. And, with the addition of a 4.5-volt AC adapter (sold separately), this building will blaze forth with unparalleled glory!

Prelit on All Four Sides by Over 20 LED Lights!

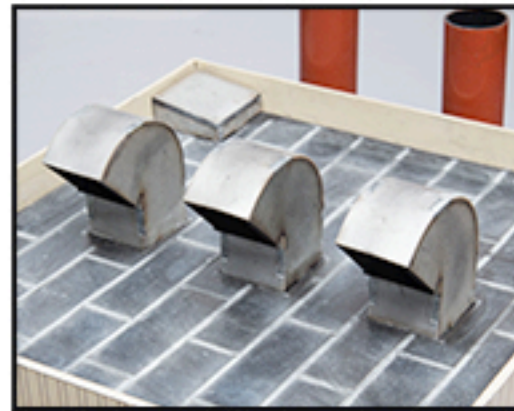

**A big building
with a small footprint**
