

MTH RealTrax track table

There is a table showing the combinations of RealTrax straight track that add up to the given lengths. This is supplied as a guide for those designing layouts with RealTrax O track. Shaded rows are lengths that cannot be created, here you must subtract a 10 inch straight section to move up to the next length, if possible. Red items denote alternate filling combinations.

Length	3.5"	4.25"	5.0"	5.50"	10.0"
