Ray's construction crew is hard at work at the future site of Tampa Towers! Once completed, this state-of-the-art high-rise building will feature everything from luxury condominiums to retail shops!

You can't build a high-rise without the right equipment! Fortunately, this structure includes two solidly built trucks - including a cement mixer and pump truck with articulating arm that reaches 32" above the ground! Both of these trucks are highly detailed with movable parts and constructed of heavy die-cast.

With a labor force of (19) O scale workers, Ray's construction crew has more than enough people to get the job done quickly! You will also notice they have the construction materials they need scattered throughout the scene, including three pallets of block, a crate, a toilet, a sink, and even the blueprints!

We've never attempted a building with this much stuff! If you were looking to assemble a collection of accessories like THIS from our competitors, you'd be looking at an **OVER \$260** price tag not including the building! At Menards®, we're including all of these things **AND** the building for **only \$129.99!**
