

INVITATION TO PLEASURE When you board the Santa Fe's great new San Francisco Chief, you step into another world . . . a world of quiet and comfort, of beauty and exciting scenes, where sociability and serenity are your companions.

Featured among the San Francisco Chief's many stainless steel Budd cars are the spectacular "Big Domes" from which you can view the Santa Fe's magnificent and varied scenery as it has never been seen before while, if you wish, enjoying your favorite refreshments.

The San Francisco Chief is a wonderful example of the way the nation's railroads are making rail travel as enjoyable as it is dependable and safe. Never has the invitation to go by rail been so compelling.

The Budd Company, Philadelphia, Detroit, Gary.
