Rats--forgot how to do this. I want to copy and paste selected articles from the Forum and into a folder. Best way to do this?

I would save them as a PDF.

There have been some threads on this. Here's one:

Right-click on the thread body and select Print - then print how you wish. If you have Windows 10, you can select Print to PDF as the printer and name the document and you will have it archived in pdf format
